Profile

Computing graduate (Higher Diploma, NCI, 2.1) who designed, built, tested and deployed a full-stack Java web application now running live. Strong in Java and Spring Boot, relational databases and turning real-world processes into automated, reliable software. Brings seven years of international hospital administration and customer-facing work, so comfortable explaining technical ideas to non-technical people. Methodical, quick to learn and careful about testing before anything goes live.

Technical Skills

- **Languages & frameworks:** Java, Spring Boot, Spring Security, Hibernate JPA, Thymeleaf, HTML, CSS, Bootstrap 5
- **Databases:** PostgreSQL, MySQL, relational data modelling
- **Tools & deployment:** Git/GitHub, Maven, Render, Supabase, environment and production configuration
- **Testing & quality:** JUnit unit testing, requirements documentation, careful pre-release checks
- **Security:** authentication and access control, BCrypt password hashing, expiring-token password reset
- **AI & automation:** practical use of AI coding assistants; building rule-based workflows and schedules
- **Professional:** clear written documentation, explaining technical options to non-technical teams, accurate data handling

Key Project

Homie – Shared-House Management Web App · Final project, National College of Ireland · 2026 · GitHub

A full-stack web app that lets any shared household automate chores, schedules and shared costs that are usually tracked by hand. Built solo and running live, used by a real 9-person house.

- Built automated workflows: a self-rotating weekly cleaning rota plus bin and washing-machine schedules that update per person and per room.
- Created a shared-bill tracker that splits costs equally, with role-based permissions for editing and marking payments.
- Added an announcements board, member profiles, notifications and a secure password-reset email flow with expiring tokens.
- Implemented login and access control with Spring Security and BCrypt password hashing.
- Wrote 56 JUnit unit tests across the service layer and documented functional and non-functional requirements.
- Deployed to Render with a hosted PostgreSQL database on Supabase, managing production configuration and environment variables.

Tech: Java, Spring Boot, Hibernate JPA, PostgreSQL, Thymeleaf, Bootstrap 5, Spring Security, Maven, Git/GitHub, Render

Education

Higher Diploma in Science in Computing (Software Development) · National College of Ireland · 2025–2026

Second Class Honours, Grade 1 (2.1). Modules included Software Architecture and IT Security.

BSc Airline Business Management · Stamford International University, Thailand · 2013–2017

Work Experience

Customer Service Assistant · An Post, Ringsend & Ballsbridge, Dublin · Jan 2026 – Present

- Process cash, card and voucher transactions accurately at a busy customer-service desk.
- First point of contact for customers, resolving queries quickly and professionally under time pressure.

Catering Assistant · Beacon Hospital, Dublin · Jan 2026 – Present

- Work to fixed daily processes and schedules, managing several tasks at once in a fast-paced hospital setting.
- Maintain strict hygiene, food-safety and health-and-safety standards.

Patient / Administrative Assistant · Bangkok Hospital, Thailand · 2018 – 2025

- Supported 80–150 international patients a day, coordinating appointments and follow-ups across multiple departments.
- Managed patient records in the TrakCare hospital information system accurately, consistently and securely.
- Acted as the link between patients, doctors and departments, explaining processes clearly to people from many countries.

Waiting Staff · Cassidy's, Camden Street, Dublin

- Delivered friendly, efficient table service in a busy pub as part of a close team.

Certifications & Additional

- Basic Barista Course
- Elderly Care I – National Cheng Kung University Hospital (Thailand MOOC)
- Full driving licence, Category B (automatic)
- Interests: piano and guitar, recording song covers, travelling and exploring new cultures
